Swivelite Reflectors

Absolute Light Control for Show Windows

Specifications
No. 109

Swivelite with Center Spot Beam.

Reflector: 9 inches in diameter.

Finish: Reflector—Mottled Green Barrel and Frame Statuary Bronze.

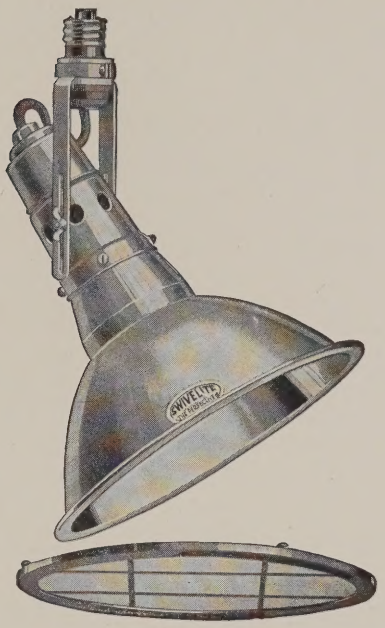
Wired: Complete.

Color Screens: Amber, Red, Blue and Green.

Lamp: Standard 100 or 150 watt Nitrogen (not included).

Packing: Individual Corrugated Cartons (12 to standard package).

Price: $9.25, each.



No. 109
100-150 Watts

Note

For purposes of general show window illumination, we recommend the use of the new type A23 inside frost lamp, with ordinary socket extension, not more than one inch long.

Note

Swivelites need no special fittings to install — screw in like lamps, and can be focused to any point in the window.

The modern merchant knows very well the value of a scientifically lighted show window. Good lighting sells merchandise—and the **SWIVELITE** spots the center of the attraction in your show window, focusing the passer-by's attention unerringly.

SWIVELITE spots the central feature of your window display—picks it out from the other points of interest in your window, and holds attention there first. It simply emphasizes the chief attraction without detracting from the rest of your display.

Guarantee

Swivelite Reflector is unbreakable—reflecting surface and outer finish guaranteed not to check, crack, peel or discolor for five years.

Swivelite reflectors fill the definite need of thousands of show window display men. It gives them a unit that is almost instantly adaptable to any special lighting arrangement in addition to developing and sustaining 33⅓% more efficient general light on merchandise than any of the present accepted glass mediums.
